## EDITOR'S REPORT

Dear President and Members of the Board of Directors of the ASGS:

The publication and mailing of the February 2007 and the May 2007 *Fusion* have proceeded on schedule. McCain Printing and their graphic designer continue to do excellent professional work as do proof readers Dave Smart, Rick Smith and Jim Hodgson.

The last remaining outstanding technical paper from the 2006 Symposium was finally submitted to me in February. The Publications Committee was then able to determine that there was sufficient material to warrant the publishing of a separate *Proceedings*. This allowed the publication process to move forward and, at the present time, the final draft of the 2006 *Proceedings* is being reviewed. Corrections will be submitted to McCain Printing within the week. Once it has been printed, it will be bound and mailed. Once more, I am frustrated that the lateness of the submission of the papers has resulted in a delayed *Proceedings* publication. Until papers are sent to me in a more timely fashion, however, this is a matter that is out of my control.

It was a great pleasure to work with Stephanie Stevens at the National Office. While she was in charge of many ASGS matters, Stephanie's handling of the advertising and other matters related to *Fusion* was always meticulous and thorough; she and her professional work will be missed. To date, my contact with Cindy Hopper has been somewhat limited, but I am sure that she will be equally efficient and I look forward to working with her.

There is always a need for material for *Fusion*. Please encourage your members to share their knowledge in the form of articles or Lamp Shop Hints.

Respectfully submitted,

*Marilyn C. Brown*
