

Southern California Section Report

Our section has not had a meeting as yet this fall. We had hoped to have one. We have a meeting tentatively scheduled for January at Kildee Scientific and have a committed sponsor for that meeting. I will try to have a date by the BOD meeting. We are in process of compiling an e-mail list to make for quicker communication among members. Our section has lost some members through attrition and see the possibility of a couple of retirements in the near future. For those interested I am not able to disclose these positions at this time. We will need some outside help in filling committee positions for the symposium.
